

## QGIS Application - Bug report #11236

### Relations children are not shown in browser form

2014-09-20 03:55 AM - Nyal Dawson

<b>Status:</b>	Closed	
<b>Priority:</b>	Severe/Regression	
<b>Assignee:</b>		
<b>Category:</b>		
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 19543
<b>Description</b>		
<p>In current master child features are not shown in the browser when the browser is in the form display mode. The features correctly show if the form is opened using the identify tool.</p>

I guess you are referring to the relations widget?

I don't know the browser very well. How do you open a form with custom styling in the browser? Styling information (form layout, widget definitions, relations) are saved in the project while I only know the possibilities to preview single layers in the browser and not projects.
