

QGIS Application - Bug report #11247

expression builder cursor in wrong place

2014-09-22 03:15 AM - Gavin Fleming

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 19548
Description		
QGIS Master (2.5)		
When building an expression by double-clicking on items in the function list, the cursor is placed before the newly-added item instead of after it, so you can't put the expression terms in the correct order without watching carefully and manually setting the cursor position each time.
