| Category: | C++ plugins/Topology checker | |
| Affected QGIS version: | 2.4.0 | Regression?: No |
| Operating System: | Windows XP | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: worksforme |
| Crashes QGIS or corrupts data: | Yes | Copied to github as #: 19557 |
| Description Every time I use the Topology Checker QGIS 2.4 crashes. Here are the steps I perform. 1) Open polygon vector layer (shapefile). 2) Started the Topology Checker. 3) Create rule: Must not have invalid geometries. 4) Click on one of the identified features. 5) Activate Editing 6) Start zooming in and out around the feature using boxes This crashes the application | | |

History

#1 - 2014-10-03 05:01 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

It seems ok on qgis master, using your data under both linux and windows. Please reopen if necessary.
