

QGIS Application - Bug report #11289

Map Canvas doesn't refresh well with diagrams on vector layer

2014-09-29 05:29 AM - Harrissou Santanna

Status:	Closed	
Priority:	Normal

Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 19585
Description Add a vector layer and open its properties dialog In Diagrams tab, check "display diagrams" and set diagrams properties as you want Press OK. You must get diagrams on your features uncheck the layer visibility in the TOC and check it back. You then will see the features in the layer but no diagram will appear. Any other change you'll do in the TOC resulting in the refreshment of the map canvas (add new layer, show/hide layer...) won't make visible your diagram. The only way I found to display the diagrams is to change map canvas extent (pan or zoom)
