QGIS Application - Bug report #11292
Print Composer breaks templates that work in 2.4

2014-09-29 10:03 PM - ramon .

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	win7-64bit	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	19588	

Description

In b044d4d (intstalled 30Sep via OSGeo4W) the print composer exhibits a number of problems loading templates that work in QGIS 2.4 (e.g.2-4ComposerFromTemplate).

1. Does not observe page orientation in existing templates (2-5ComposerFromTemplate).

2. Some objects in 2.5 are considered wrt different points (top left of page for objects that intersect the page and bottom left of the page for objects that are off the page), meaning that when the page orientation is fixed, objects are moved about when if they stayed still they'd be in the write place (2-4ComposerFromTemplate2).

I've set to major as it doesn't corrupt anything - but it does stop things that worked previously from working. It's also a bit irritating to have to go through and fix my print templates twice in two years.

History

#1 - 2014-09-29 10:55 PM - ramon .

Probably related in some way to #11255

#2 - 2014-09-29 11:02 PM - Nyall Dawson

- Resolution set to duplicate

- Status changed from Open to Closed

Duplicate of #11255
