QGIS Application - Bug report #11294
Can't save project using Windows 8

2014-09-30 12:38 AM - Lisa Chapman

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Project Loading/Saving		
Affected QGIS version:	2.4.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	end of life
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19590

Description

I am a Computer Officer supporting a user of QGIS.

He reports the following:

"QGIS is failing to write a Legend file. I am able to create files from Windows and edit with Notepad. However, my data folders still show as 'Read Only' after I have unselected this (Read only) and Applied to sub-folders, so there does still seem to be something odd about file permissions. "

I note that there have been similar problems by other users but can find no evidence of a solution.
