

QGIS Application - Feature request #11320

Not sure if this is the place, just reporting it works on my device

Pull Request or Patch supplied:	No	Resolution: invalid
Easy fix?:	No	Copied to github as #: 19616
Description		
<p>Just wanted to report that I downloaded this on the OnePlus One Android smartphone, and it looks pretty good. I haven't had a chance to play with any data yet, but I thought it would be helpful to add this device to the list of devices that it appears to work on... if such a list exists.</p> <p>I'll post back here if I run into any issues. I'm still kinda new to QGIS so half the battle is still learning how it functions. But I'll plan to compare against the version I'm running on an Xubuntu 12.04 machine before submitting bug requests.</p> <p>Looking forward to it. If there is a different place I should have posted this then please direct me that way.</p> <p>Thanks all!</p>
