

QGIS Application - Bug report #11370

geoserver wms with style in workspace not visible in qgis

2014-10-09 07:35 AM - Raymond Nijssen

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WMS	
Affected QGIS version:	master	Regression?: No
Operating System:	linux	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 19661
Description		
<p>When I open a WMS service from GeoServer that has a style in a workspace (i.e. "workspaceName:sldName"), QGIS does not properly send the WMS request. It chops off the workspace (i.e. "sldName") which results in an error by GeoServer. The layer appears white in the map and legend icon.</p> <p>QGIS should not leave away the workspace name and ":".</p>		

History

#1 - 2017-05-01 01:08 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#2 - 2019-03-09 04:09 PM - Giovanni Manghi

- Resolution set to end of life
- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
