Crashes QGIS or corrupts data:		**Copied to github as #:**	19684

Description

When opening the field calculator the OK button is active in the very beginning but becomes inactive as soon as the first input is entered. It is reactivated as soon as all neccessary input has been entered. IMHO it should be inactive in the first place.

Associated revisions

Revision 0c4a5015 - 2014-10-14 09:08 AM - Matthias Kuhn

Address some GUI issues on the field calculator

- Info labels for edit mode turn on was not shown
- Ok button was active when opening the field calculator even with no input (Fix #11403)
