QGIS Application - Bug report #11449
.osm extension missing when downloading OSM data with the "download OSM data" tool

2014-10-20 05:24 AM - Gavin Fleming

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Vectors			
Affected QGIS version:	2.4.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	19725

Description

Please add .osm file extension automatically to downloaded file. If the user doesn't add it, QGIS doesn't recognise the file as OSM - it opens it but treats it like GPX and shows waypoints, routes and routepoints. If you then add .osm then QGIS sees all five OSM layers.

History

#1 - 2014-10-20 07:34 AM - Giovanni Manghi

- Affected QGIS version set to 2.4.0

- Subject changed from OSM Vector tool to .osm extension missing when downloading OSM data with the "download OSM data" tool

- Tracker changed from Feature request to Bug report

- Crashes QGIS or corrupts data set to No

- Status changed from Open to Feedback

I just tested on master and the .osm extension is added properly.

#2 - 2015-05-10 02:29 AM - Giovanni Manghi

- Status changed from Feedback to Closed

- Resolution set to not reproducable

closing for lack of feedback.
