Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Hi,</p> <p>in joined attribute by localisation there is a option box for attribute basic statistique like mean, sum, min, max.... this will so help full to find this in Dissolve after choose the input fields because we loose importante information because actualy QGIS keep the firt entitie attribute For example I want obtain French region based on French department using region code as input field I would like to obtain in the next shapefile the sum of numeric value for population.</p>
