

QGIS Application - Feature request #11492
DXF load: Don't ask for CRS twice (or three times, four times...)

2014-10-24 07:14 AM - Asier Sarasua

Status:	Open	Resolution: Copied to github as #: 19762
Priority:	Low	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>When loading a DXF file, and if "Prompt for CRS" is enabled in "CRS > CRS for new layers" option (which is the default value), QGIS asks for CRS in two moments:</p> <ul style="list-style-type: none">- When the DXF file is loaded.- When each of the DXF's geometry types (points, lines, geometry collections) is loaded. If the user loads all of the 3 types, CRS is required 3 more times.
