QGIS Application - Bug report #11495
it is not possible to select the extent of another layer in the Modeler

2014-10-25 02:52 AM - Filipe Dias

Status:	Rejected			
Priority:	Normal			
Assignee:	Victor Olaya			
Category:	Processing/Modeller			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	wontfix	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	19765	

Description

It is not possible to select the extent of another layer for "clip vector by extent" and "clip raster by extent" in the Modeler. This doesn't happen when this algs are used in the toolbox.

I'm not sure whether this is a bug or a limitation.

History

#1 - 2015-02-04 12:16 AM - Alexander Bruy

- Target version set to Future Release - High Priority

This also affects all other tools that accept extent as input parameter. As result it is almost impossible to create models that involves such tools.

#2 - 2015-02-04 01:44 AM - Giovanni Manghi

- Affected QGIS version changed from 2.4.0 to master

- Subject changed from Clip vector by extent and clip raster by extent: it is not possible to select the extent of another layer in the Modeler to it is not possible to select the extent of another layer in the Modeler

#3 - 2015-02-04 02:25 AM - Filipe Dias

If it's not possible to fix this before QGIS 2.8 is released I would suggest removing this option

#4 - 2015-05-20 01:21 AM - Alexander Bruy

- Resolution set to wontfix

- Status changed from Open to Rejected

There are special algorithms in modeler for this: "Vector layer bounds" and "Raster layer bounds" from "Modeler-only tools"
