Easy fix?:	No	**Copied to github as #:**	19771

Description

I used "clip grid by polygon" from OGR Miscellaneous and the result was an empty shapefile. I run the code from the command line to see what happened and realzied, through the error messages, that one of the polygon had topological errors.

I think it be useful for users to be able to read the results from the execution of the code, in case a similar situation happens to them.
