cannot confirm on osgeo4w/master. Will test also Linux.

#2 - 2014-11-02 06:10 AM - Filipe Dias

Step to reproduce: on "Input extent", select a layer loaded in the project and then press "Point spacing count". If you simply open and empty project and press "point spacing count" it won't freeze.

I remembered than when I upgraded QGIS Master, I saw an installation error regarding libqgis-customwidgets. Can this be the cause?

#5 - 2014-11-02 01:39 PM - Filipe Dias

Im on Ubuntu 14.04 and installed QGIS Master from Ubuntugis nightly

Looks like local issue. I tested on two computers and it is not reproducible. Please check other algorithms with numeric parameters.

I believe this had something to do with the fact I was working on a project built with qgis 2.4. When I created a new project with QGIS 2.6 and tried to do the same thing it did not freeze.
