I'm not sure this is bug report or a question. Assuming is a bug report we must know more details: what editing operations? what operating system? does it happen on any shapefile or just a specific one? can you attach a sample of the problematic data? Can you make a screencast to allow us understand better your problem?

the attached vector edits with no issues whatsoever here. To allow us understand you must give us more details about the operation you are doing and eventually the error messages you are getting. A screencast would help a lot.
