user: "testqgis26;armin.retterath@gmail.com"

pwd: "testqgis26"

Hope that helps ;-)

Did you just fix the server? I could reproduce the problem - but not anymore.

Hi Jürgen - fixed the Server? Maybe the credentials are stored somewhere and reused by QGIS?

- Subject changed from WMS Interface to Cannot to load http_digest authenticated WMS

#7 - 2014-11-13 11:32 PM - armin11 -

I altered the email of the user to authenticate to armin.retterath(at)gmail.com.

Therefor you have to use:

username: 'testqgis26;armin.retterath(at)gmail.com'

password: 'testqgis26'

We noticed, that some java http_auth libs have problems with the @ sign ;-) - but this should be a bug in the java libs

- *Resolution set to not reproducible*

- *Status changed from Open to Closed*

Test credentials and/or server are not valid anymore.

Closing also because WMS behind basic http authentication works as expected (while we know the wfs client has some issues storing the username).

Please reopen if necessary.
