Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 19839
Description		
Hello, I'm trying to install qgis-mapserver on my ubuntu 12.04. I just installed qgis desktop 2.6.0-brighton successfully. Here is my steps when installed the desktop : <pre>sudo apt-get install python-software-properties sudo add-apt-repository ppa:ubuntugis/ubuntugis-unstable sudo apt-get update sudo apt-get install qgis python-qgis qgis-plugin-grass</pre> But when I tried to install the mapserver : <pre>sudo apt-get install qgis-mapserver libapache2-mod-fcgid</pre> I got this error : The following packages have unmet dependencies: qgis-mapserver : Depends: qgis-providers (= 2.4.0-0precise2) but 2.6.0-0precise1 is to be installed Regards, Satria
