QGIS Application - Bug report #11580
Cannot edit shapefiles created in older versions of QGIS

2014-11-06 05:27 AM - Thomas Wyse

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:				
Affected QGIS version:	2.6.0		**Regression?:**	No
Operating System:	Windows		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	worksforme
Crashes QGIS or corrupts data:			**Copied to github as #:**	19841

Description

I can only edit shapefiles created with version 2.6. Old projects load correctly, but shapefiles can't be edited.

- Status changed from Open to Feedback

please attach a sample project with data to allow us make tests.

#2 - 2014-11-09 09:30 PM - Nicolas Cadieux

I had this problem with shape files created in AutoCAD 2013. These layers only had 3 associated files each and not the usual 4 or 5. Solved it by doing a "save as". Then the shape file could be edited. Could this be the source of the problem?

#3 - 2015-01-10 01:45 PM - Jürgen Fischer

- Resolution set to worksforme

- Status changed from Feedback to Closed

You probably exported from AutoCAD without attributes. Shapefiles without attributes are readonly in OGR.
