

QGIS Application - Bug report #11600

QGIS > 2.2 always crashes at quit with minidump (on my Win 7 64 bit)

2014-11-08 05:11 AM - Roberto BobMaX

Status: Closed	
Priority: High	
Assignee:	
Category:	
Affected QGIS version: 2.6.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: Yes	Copied to github as #: 19857
Description	
<p>I have always a minidump when quit QGIS > 2.2</p> <p>I tested also with:</p> <p>qgis --noplugins</p> <p>as you can see in this:</p> <p>https://drive.google.com/file/d/0Bwg_m86uaXY1UTlodVVEa0luZzg/view?usp=sharing</p> <p>containing images from test and (the last one of many) minidump I had.</p> <p>Regards</p> <p>Roberto</p>	

History

#1 - 2014-11-08 05:28 AM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from No to Yes
- Priority changed from Severe/Regression to High
- Status changed from Open to Feedback

try (backup) and delete the .qgis2 folder, I have seen this a lot on qgis installations where qgis was previously installed, and purging .qgis2 usually works.

#2 - 2014-11-08 06:29 AM - Roberto BobMaX

renaming .qgis2 directory, it works and the minidump disappears.

I will test re-inserting plugins one by one.

#3 - 2014-11-08 08:26 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Feedback to Closed

I have not investigated deeply, but in this cases it may not be a plugin, but some (old) configuration stored inside .qgis2.
