Affected QGIS version:	2.6.0	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	end of life
Crashes QGIS or corrupts data:		**Copied to github as #:**	19876

Description

Good afternoon,

the use of home-made svg symbols (with inkscape) in a map does not respect text align (try symbol1.svg in attached), even if the elements are grouped.
A workaround is to transform text object into path (try symbol2.svg in attached).

Thanks a lot, again and again !

Mathieu
