

QGIS Application - Feature request #11642

Symbol levels on all layers

2014-11-14 03:18 AM - Oskar Karlin

Status:	Open	Resolution: Copied to github as #: 19895
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>As I understand now Symbol levels can only be used within each layer. In a map document I have tons of layers of features and it would be so much better if these symbol levels worked through all layers. So that symbol level 0 will always be underneath level 1 regardless where how the layer is positioned in the layer list.</p>
