<b>Description</b>		
<p>When using Settings &gt; Custom CRS, the program returns the following error message:</p> <p>The proj4 definition of ' * Generated CRS ()' is not valid.</p> <p>This result occurs regardless of the proj4 code. As a test case, I copied the crs for WGS84, and it gave the same error. The calculations work fine. I have attached a screen shot showing the error for the WGS84 example.</p>
