<b>Assignee:</b>		
<b>Category:</b>	MetaSearch Catalogue Client	
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b>
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 19969
<b>Description</b>		
<p>Suggestion that the plugin be able to parse the BBox of a layer to use in its search query.</p> <p>The suggestion comes handy when there's a reference Shapefile, KML... and there's a need to search the catalog for intersecting datasets</p>		

#### History

**#1 - 2015-08-21 04:56 AM - Tom Kralidis**
