<b>Description</b>		
<p>The GUI allows only jpg or png images from WMS servers. It should ideally allow the user to select any image format which the capabilities document says can be supplied. (In my particular case png;24bit is very useful)</p>

Sort of fixed in SVN commit:45cf9dd1 (SVN r5479). The actual problem with 24bit png seems to be with the wms server, not qgis.
