

QGIS Application - Bug report #1181

Problem with v.what.rast from the shell of Grass Tools

2008-07-25 01:00 AM - leolami -

Status:	Closed	
Priority:	Low	
Assignee:	Lorenzo Masini	
Category:	GRASS	
Affected QGIS version:		Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11241
Description		
<p>If I use the command v.what.rast from the shell of the GRASS Tools the shell stop to work and anything happens. To stop the command I must click on the 'Close' button of the shell, Ctrl-C doesn't work.</p> <p>When I close the shell I see that v.what.rast command works well (the column is update), but the shell of GRASS (I have run QGIS from GRASS) says:</p> <pre>v.what.rast vector=punti@piana_prato raster=bo_perm@piana_prato layer=1 column=valore kill shell pid = 3267 final = K final = K final = A ESC ignored: [A final = A ESC ignored: [A final = K kill shell pid = 3292 final = K final = K final = A ESC ignored: [A final = A ESC ignored: [A final = K final = K final = K final = K final = K UNKNOWN control char ignored: 7 UNKNOWN control char ignored: 7 UNKNOWN control char ignored: 7 final = K final = K final = K final = K final = K final = K final = K final = K final = K</pre>

GRASS 6.3.0svn (Toscana):~ >
GRASS 6.3.0svn (Toscana):~ > kill shell pid = 3451

This confirms that the command works but there is something in the code that creates the stop on the shell of GRASS Tools.

History

#1 - 2008-11-07 12:13 PM - Markus Neteler

I tried with QGIS-trunk with Spearfish on Mandriva:

```
g.copy vect=archsites,myarchsites --o
v.db.addcol myarchsites col="owner varchar(25)"
v.info -c myarchsites
v.what.vect myarchsites qvect=fields column=owner qcolumn=label
```

and it got stuck.

#2 - 2009-04-28 12:30 AM - Paolo Cavallini

Fixed in commit:73e86da0 (SVN r10666) on *nix, OSX and minGW. Still to be solved for MSVC.

#3 - 2009-04-28 01:56 AM - Jürgen Fischer

Replying to [comment:4 pcav]:

| Fixed in commit:73e86da0 (SVN r10666) on *nix, OSX and minGW. Still to be solved for MSVC.

#4 - 2009-06-23 11:21 PM - Paolo Cavallini

- Resolution set to fixed
- Status changed from Open to Closed

So this is closed. A different method should be found to have a proper terminal in windows

#5 - 2009-08-12 12:45 AM - Paolo Cavallini

- Resolution deleted (fixed)
- Status changed from Closed to Feedback

#6 - 2009-08-12 12:45 AM - Paolo Cavallini

- *Status changed from Feedback to Open*

#7 - 2009-08-12 12:46 AM - Paolo Cavallini

- *Resolution set to fixed*

- *Status changed from Open to Closed*
