QGIS Application - Bug report #11839
add WxS layer from browser defaults to first projection instead of project projection

2014-12-11 01:25 AM - landry Landry Breuil

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Web Services clients/WMS			
Affected QGIS version:	2.6.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:		**Copied to github as #:**	20056	

Description

When adding a WMS layer from the browser, it will default to the first EPSG code listed in the getcapabilities document. Would be nicer to use the project's projection by default if its available in the advertised projections.
