

QGIS Application - Bug report #11858

Map Composer and QGIS crash when trying to print or export using raster layers

2014-12-12 09:00 AM - Soren Lindqvist

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 20073
Description		
<p>Hello!</p> <p>I have been trying with both winXP and win2003 server SP2 Enterprise 32 bit to print or export to pdf file and both OS has the same problem.</p> <p>I have several raster layers (about 29mb for each tif files) and vector layers I want to print or export to pdf but every time I try it crash on me. This did not occur on 2.4.</p> <p>There is an error message... I have to get back to that one next week...</p> <p>Regards Soren</p>

Have you tested on QGIS 64bit? and on another platform (like Linux)? Can you share a sample project and data?

#2 - 2014-12-14 06:11 AM - Soren Lindqvist

No I have not tried on 64bit version, I will try with Mac in the coming days. I do not have other platforms available at work then XP and win 2003 server. Sample data is difficult as it is a license issue with raster files. I could send the project file and map composer file if that is of any help...

please try 2.6.1 32/64 bit and see if there is any difference.
