Cannot reproduce with 3.0-rel-dev nor master(3.1) on windows.

Can you confirm, Paolo?

Cannot test on 3.1 now. On 3.0 it was as in 2.18.

Thanks.

This is still unchanged. To better explain: I believe that the menu `Settings` in the Layout window should not bring up the whole `Options` popup, as it happens currently (with the `Layouts` tab preselected), but a dialog with **only** the `Layout` options. The current situation is confusing to the user.
