History

#1 - 2014-12-23 02:30 AM - Sandro Santilli

Please add "in case of rotation" in the title, as that's the condition for the artifacts to show up (it's important to clearly mark this not as a regression)

#2 - 2014-12-23 03:28 AM - Giovanni Manghi

- Subject changed from zoom by rectangle shows artifacts to in case of rotation zoom by rectangle shows artifacts

it is not a regression, but blockers are also new features that do not work as expected. In this case I'm not sure what to do will all this issues about the rotation or caused by, as there is much discussion about it. To me they should be all fixed in time for 2.8 (so they all should be blockers).

#3 - 2014-12-30 08:07 AM - Sandro Santilli

- File rubberband_rotation.patch added

I've a fix for this issue, but it builds on the workaround to limitation of QgsMapCanvasItem::setRect which was reported in #11909
The patch is attached for review.

\\cc Martin Dobias

#4 - 2015-01-03 08:11 AM - Sandro Santilli

- Resolution set to fixed/implemented

- % Done changed from 0 to 100

- Status changed from Open to Closed

Fixed with commit:d7269595e12cba8b7e3b45dcd3a7b63b1712d8ad
