

QGIS Application - Feature request #11934

Layer Properties - Add possibility to synchronize Style and Labels

2015-01-04 02:20 AM - baditaflorin -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Pull Request or Patch supplied:	Resolution:	wontfix
Easy fix?:	No	Copied to github as #: 20142
Description		
<p>This will apply only to Categorize and Graduated</p> <p>A lot of the time when i work, especially on the process of making and saving statistics about the counties in my country , i first load the style, i select the Column, then i hit Classify, Apply to see how it's looking.</p> <p>And then a lot of the time, for the output map, i want also to activate the Label that is on the corresponding Column</p> <p>So you need to Click on the Labels Tab, Then click on Label this layer with , then click on the Drop-Down Menu, Scroll until you find, then Click on it, Then Click apply or Ok</p> <p>This can be a 3-10 seconds delay on each run.</p> <p>A simple check-box option on the Style Tab that would basically say Check if you want the Label to be the same with the Style</p>

- Resolution set to wontfix
- Status changed from Open to Closed

Thanks for the suggestion. I think in this case it's not a huge problem to select the field in both dialogs. We're trying to avoid adding extra widgets for every situation to avoid ui bloat.
