| **Pull Request or Patch supplied:** | No | **Resolution:** | |
| **Easy fix?:** | No | **Copied to github as #:** | 20150 |

**Description**

If you have 20or more columns that you want to re-size, you have to do it one by one. This takes a lot of time, and i am not even sure that it will remember the next time i load the document, meaning that i have to repeat the process every time i reload the document

**History**

**#1 - 2017-05-01 12:47 AM - Giovanni Manghi**

*- Easy fix? set to No*
