Pull Request or Patch supplied:	No		**Resolution:**	invalid
Easy fix?:	No		**Copied to github as #:**	20153

Description

Now, Map Composer Legend Show the name of the File.
I am working with the same file, that have over 100 columns, and i want to print a map of each of the different values, represent%d via Style > C!tegory

Each ti-e i do this, i (ave to -anually`change the name`in the legend to corres0ond to 4he column, not the file.
cut this be possible, via Expressions or something ?
