

QGIS Application - Bug report #11946

Regression - Style - Categories not working for the columns that come from a Join Layer

2015-01-04 12:51 PM - baditaflorin -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 20154
Description		
I have attached the spatial-lite file.		
In qgis 2.4 i can use the Style > Categories		
Also if i save as SHP, is working, but i don't get to understand nothing of the columns because everything after the 8th character or so in the description is erased

Can you provide more details? From your description I understand that everything works fine, but column names was truncated in exported file. How this related to ticket title where you refer to rendering issues with categorized renderer?

#2 - 2016-05-23 08:20 AM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

closing for lack of feedback , please reopen if necessary.
