| Description | | |
| <p>When using a lot of layers, it becomes annoying to set snapping options.</p> <p>For example: If just one layer should have snapping, you have to deselect all others by clicking each. Or if all layers should have snapping, you have to select all one by one.</p> <p>Sometimes you want to snap all points shapes or just want to disable snapping at all.</p> <p>So I would like to have 5 predefined 5 options:</p> <p>Seclect all</p> <p>Deselect all (no snapping)</p> <p>Select all line shapes</p> <p>Select all point shapes</p> <p>Select all polygon shapes</p> | | |
