Description		
Help for format_date function says this as its example: Example format_date('2012-05-15','dd.mm.yyyy') → 15.05.2012 However, the "mm" (lower case m's) gets the minutes, not the month. Correct is: Example format_date('2012-05-15','dd.MM.yyyy') → 15.05.2012
