QGIS Application - Bug report #12056
"Also list tables with no geometry" option indicated twice while adding a PostGIS table

2015-01-26 03:16 AM - Harrissou Santanna

Status:	Closed		
Priority:	Normal		
Assignee:	Jürgen Fischer		
Category:	Data Provider/PostGIS		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	wontfix
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20258

Description

Open a project

click "Add PostGis layers" button

In the "Add PostGIS table(s)" dialog, click to define a new connection.

"Create a new PostGIs connection" dialog is opened. Inside, there is an option named "Also list tables with no geometry".

The same checkbox is present in "Add PostGIS table(s)" dialog.

I think these options have always been there but if they do the same thing...

I may be wrong but shouldn't only the one in "Add PostGIS table(s)" dialog be kept? so the user while connecting can do the relevant choice.

Maybe, the one in "Add PostGIS table(s)" should remind the last choice made by the user (depending or not of the choosen connection?).

History

#1 - 2016-06-21 03:28 PM - Jürgen Fischer

- Resolution set to wontfix

- Status changed from Open to Closed

The connection setting is the default for the selection dialog.
