

QGIS Application - Feature request #12059

WFS: DWithin support

2015-01-26 07:06 AM - Jeffrey Bostoen

Status:	Open	Resolution: Copied to github as #: 20261
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WFS	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
It would be great to have DWithin support for WFS-requests.		
QGIS can already buffer, so this shouldn't be had to implement?		

History

(mistake, sorry)

#2 - 2015-01-30 04:55 AM - Giovanni Manghi

- Status changed from Open to Feedback
- Category set to Web Services clients/WFS

How this would work from the user/gui point of view?

#3 - 2015-02-02 06:31 AM - Jeffrey Bostoen

Perhaps this might add more info:

- <https://wiki.state.ma.us/confluence/display/massgis/GeoServer+-+WFS+-+Filter+-+DWithin>

From the GUI in QGIS client, I just imagine the ability of doing a spatial selection, similar to the existing ones. Probably similar to intersect (after performing a buffer)?

I can't see how to achieve that in the wfs client as it is implemented now, but of course anything could be done :)
