QGIS Application - Bug report #12061
Drag and drop designer forms problem

2015-01-26 11:09 AM - Pedro Venâncio

Status:	Closed		
Priority:	Severe/Regression		
Assignee:	Matthias Kuhn		
Category:	Forms		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Windows and Linux	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20263

Description

- Windows (OSGeo4W 64 bits):

In forms (Drag and drop designer) if you have multiple tabs created, the form opens well, but if you switch to another tab, you can not go back to the first tab. Please see the screencast: https://dl.dropboxusercontent.com/u/5772257/qgis/drag_drop_forms_windows.avi

- Linux:

Something similar happens, but does not seem to be directly related to the tabs. Appears a rectangle that covers the upper left corner of the form. Please see the image attached.

This does not happen with QGIS 2.6.1.
