

QGIS Application - Feature request #12099

Saving results of Topology Checker plugin into a separate file

2015-01-30 02:15 AM - Andrea De Felici

Status:	Open	Resolution: Copied to github as #: 20294
Priority:	Normal	
Assignee:		
Category:	C++ plugins/Topology checker	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Hi to all,</p> <p>it would be very useful to save the results of Topology Checker plugin into a separate shapefile with the "wrong geometries" found, or as a simple "report" in a text file form containing the list of the geometries having some problems, so we could send that files to people working with other GIS systems to help them to find objects that have to be fixed.</p> <p>Thank you very much</p> <p>Andrea De Felici</p>		

History

#1 - 2015-01-30 02:57 AM - Giovanni Manghi

- Target version set to Future Release - Nice to have
- Category set to C++ plugins/Topology checker

I agree, this would really a must for this tool.
