QGIS Application - Bug report #12140
Opening a new project within python plugin causes blank screen

2015-02-06 12:12 AM - Shashank khare

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:				
Affected QGIS version:	2.6.0	**Regression?:**	No	
Operating System:	All	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20334	

Description

Hi!

I am trying to close the current project and open a new project in my python plugin with help of following code:
 QgsProject.instance().clear()
 QgsProject.instance().setFileName('d:/shashank/test/second.xml.qgs')
 QgsProject.instance().read()

The above throws up a blank screen. The code works fine in python console but it does not work inside my plugin.
Looks like cleanup issues with python binding.
