

QGIS Application - Bug report #12165

Join the same table multiple times

2015-02-09 10:38 PM - Andreas Neumann

Status:	Closed	
Priority:	Normal	
Assignee:	Martin Dobias	
Category:	Attribute table	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20358
Description		
<p>Currently, there is a limitation that a table can only be joined once. I wanted to join the same table multiple times - however, only the first join worked. All the other joined fields appear empty.</p> <p>My use case:</p> <p>table traffic_sign_posts (can have up to 4 different traffic signs) - has, amongst others, the following integer columns:</p> <ul style="list-style-type: none">- sign1- sign2- sign3- sign4 <p>table traffic_signs - has the following columns:</p> <ul style="list-style-type: none">- code (link to sign1 to sign4)- name- svg_symbol- symbol_size- symbol_offset <p>Now I wanted to join table "traffic_signs" 4 times to the table "traffic_sign_posts", joined with columns "sign1" to "sign4".</p>
