

## QGIS Application - Bug report #12181

### Attributes table: can't unselect lines by dragging the cursor up

2015-02-11 01:52 AM - Filipe Dias

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Attribute table	
<b>Affected QGIS version:</b>	2.6.0	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 20371
<b>Description</b>		
Steps to reproduce:		
- Select one line of the attributes table		
- Drag the selection a few lines down		
- Try dragging the selection up to unselect the last three lines		
- it doesn't work		
I remember this worked a few versions ago but I'm not sure.		

#### History

##### #1 - 2015-02-11 02:11 AM - Nathan Woodrow

- Resolution set to *invalid*
- Status changed from *Open* to *Closed*

I don't think it ever worked like that. If you hold Ctrl when dragging over cells it will unselect.

Thanks, using Ctrl + drag up I can unselect lines. I was relatively sure it used to work like this, but I may be thinking of ArcGIS or SAGA.

Is there a reason (technical or otherwise) for this behaviour? It's the behaviour one would intuitively expect since it's how Calc/Excel and also SAGA GIS work.
