QGIS Application - Bug report #12186
wrong message displayed on status bar when a layer has been removed

2015-02-11 10:15 AM - Harrissou Santanna

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:				
Affected QGIS version:	2.6.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	invalid
Crashes QGIS or corrupts data:			**Copied to github as #:**	20376

Description

Select layers in TOC and click on any button that removes a layer from the project.

You get a message box "Remove x legend entries?". click Yes.

Then, when in QGIS<2.4, the status bar showed a message like "x legend entries removed", in QGIS Master and Brighton status bar shows "Remove x legend entries ?". It still asks the question instead of showing the result.

This is a bit confusing the first time you got, doubting if you had removed or not the layers.

It's not a huge blocking feature but as it worked in earlier releases...

Seen on windows 7, QGIS 64 bits 2.6 and master 47ffa70

Just tested with QGIS master and it says "x legend entries removed" as expected. I haven't seen the question being displayed in the status bar.

Hi,

Just tested again in english now and realised it's rather a problem of bad translation. In french, the translator has just kept the same string as for the question in the message box.

Sorry for the noise.

I close it.
