

QGIS Application - Bug report #12189

Natural Earth projection is not accepted as custom CRS definition

2015-02-11 09:06 PM - Adrian Weber

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Projection Support	
Affected QGIS version:	2.6.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 20379
Description		
Natural Earth is a projection in proj.4: http://trac.osgeo.org/proj/wiki/proj%3Dnatearth The proj.4 string is <pre>+proj=natearth +a=6371008.7714 +b=6371008.7714</pre> Trying to add this projection as Custom CRS Definition fails with "The proj4 definition of 'Natural Earth' is not valid.". Testing the custom CRS (in the lower part of the same dialog) works and returns correct results.		

History
