

QGIS Application - Feature request #12196

Resize Page to Map and Vice Versa

2015-02-13 01:21 AM - Roscoe Lawrence

Status:	Open	<b>Resolution:</b> <b>Copied to github as #:</b> 20385
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
<b>Description</b>		
<p>In order to create a map that covers the full extent of the page one has to manually draw a box (during which snapping is not possible), then drag the map item into a corner (during which snapping is enabled), then resize the map to the full size (during which is also enabled). A "Resize Page to Map" and "Resize Map to Page" would be great.</p>
