QGIS Application - Bug report #12225 symbology size scale field problem in spatialite layer

2015-02-18 04:05 PM - Matt Pitts

Status: Closed Priority: Normal

Assignee:

Category: Symbology

Affected QGIS version: 2.6.0

Operating System: windows 7

Pull Request or Patch shapplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: duplicate

Copied to github as #: 20413

Description

When trying to set the size scale for scale a point layer based on a count field in a spatialite layer the count field is not shown in the list of possible fields to choose. However using this exact same layer as a shapefile the function works perfectly
