QGIS Application - Bug report #12237
Cannot change font in print composer

2015-02-22 08:57 PM - Ben Mather

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Ubuntu	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	duplicate	
Crashes QGIS or corrupts data:		**Copied to github as #:**	20423	

Description

After adding a legend, text field, or scalebar in print composer, I am unable to change the font family, size, style, etc. If I select a new font it automatically reverts back to the default Ubuntu size 11 font shown in the screenshot.

This was not a problem for the previous version of QGIS (2.6). I have tried it on another computer with the same Ubuntu distribution and QGIS version 2.8 but the problem persists.

Any help would be greatly appreciated!

History

#1 - 2015-02-22 09:01 PM - Nathan Woodrow

- Resolution set to fixed/implemented

Yeah this is a known issue with this release. It has already been patched and hopefully new packages will be out soon.

#2 - 2015-02-22 09:07 PM - Ben Mather

- Status changed from Open to Closed

Great! Thanks for the quick response.
I looked back through the bug reports before I submitted this, but obviously not hard enough!

I think it was fixed right away so there was never a ticket made for it. Don't worry this can be the reference for anyone looking why that has happened.

#4 - 2015-02-22 11:12 PM - Jürgen Fischer

- Resolution changed from fixed/implemented to duplicate

duplicate of #12233
