Affected QGIS version:	2.8.1	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20487	

Description

When importing files into a database by dragging and dropping from the browser, QGIS used to keep the DB manager window "open" or "active", at least in version 2.6. Now, the DB windows minimizes when you select a file in the browsers.

It is a small nuisance, but even so makes the task more cumbersome. I'm not sure it's a bug but I suggest reverting to the old behaviour.
