

QGIS Application - Bug report #12314

QGIS crashes when creating a raster layer histogram

2015-03-04 08:47 AM - Patrick Patrick

Status:	Rejected	
Priority:	Normal	
Assignee:		
Category:	Processing/QGIS	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch applied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 20492
Description		
<p>Hello,</p> <p>I used the 'raster layer histogram' for the first time on a elevation raster (DEM / file: TIFF).</p> <p>I get an error which seems to appear at the end of the process.</p> <p>Screenshot attached.</p>

cannot confirm here on both Linux and Windows. Please attach sample data.

#3 - 2015-03-17 07:20 AM - Radoslaw Guzinski

I can confirm it on my computer (QGIS 2.8.1 from OSGeo4W, Windows 7, 64 bit). The crash seems to be caused by this issue:

<http://trac.osgeo.org/osgeo4w/ticket/451>

A temporary fix is to replace matplotlib 1.3.1 with matplotlib 1.3.0 using the OSGeo4W installer.

#4 - 2015-04-10 05:34 AM - Alexander Bruy

- Resolution set to worksforme

- Status changed from Open to Rejected

Works fine in master and 2.8.1, Seems this is not Processing nor QGIS issue but bug in the specific matplotlib version/build.
